Professional Summary

Motivated Full Stack Web Developer with hands-on experience in building dynamic and responsive web applications using HTML, CSS, JavaScript, PHP, React, and MySQL. Skilled in designing scalable front-end interfaces and managing back-end databases. Passionate about learning emerging web technologies and contributing to impactful software solutions.

Technical Skills

- Frontend: HTML5, CSS3, JavaScript, React
- Backend: PHP
- Database: MySQL, SQL
- Tools & Version Control: Git, GitHub, VS Code
- Other: Python, Responsive Web Design

Projects

- **Online Medicine Ordering System**: Built a full-stack application using PHP and MySQL that allows users to order medicines online, with integrated admin panel for stock and order management.
- **Blood Bank Donor Management System**: Created a database-driven web app to manage donor registration, availability tracking, and blood request handling.
- **Online Library Management System**: Developed a library management platform with user authentication and book tracking functionalities using PHP and SQL.

Internship

- **CodSoft – Web Development Intern (Virtual)**: Designed and deployed responsive websites using HTML, CSS, and JavaScript. Collaborated with peers to implement modern UI/UX components.
- **Edureka – Full Stack Development Intern**: Built interactive full-stack applications using React and PHP. Learned best practices for integrating front-end and back-end modules.
